

A musical practice used for centuries the world over, improvisation too often has been neglected by scholars who dismiss it as either technically undissectible or inexplicably mysterious. At different times and in different cultures, performing music that is not precomposed has constituted an artful expression of the performers individuality (the Baroque); a wild, unthinking form of expression (jazz antagonists); and the best method to train inexperienced musicians to use their instruments (the Middle East). This wide-ranging collection of essays considers musical improvisation from a variety of approaches, including ethnomusicology, education, performance, historical musicology, and music theory. Laying the groundwork for even further research into improvisation, the contributors of this volume delve into topics as diverse as the creative minds of Mozart and Beethoven, the place of improvised musics in Western and non-Western societies, and the development of jazz as a musical and cultural phenomenon.
