

Gone are the days of pixelated sprites and simple wired controllers. It's the twenty-first century, and video game playing has undergone a complete evolution. With high-def graphics and intuitive sensory controls, gamers are enjoying a level of realism and immersion never before experienced. However, when the line between the real and cyber worlds becomes blurred, this digital landscape provides new social predators with opportunities to unleash terror and pain on unsuspecting victims. Businesses, cities, and commonly used services might believe they are immune, but then their world goes sideways as a grotesque ransom demand is spilled across their data screen. The fledgling CATS "Cyber Assassins Technology Services" team is mobilized to find the root causes. Led by Julie and Juan, the CATS team is committed to avenging and administering justice to evil doers in every corner of the real and virtual worlds. The CATS team is the next generation of hunters in the cat and mouse game of cyber warfare. Within the Enigma series, the CATS team continues to evolve and uses front-line techniques, which stretches every resource at their disposal to face off against a sinister new world of high-tech crimes.
