

Br A slight change in the title this edition is separated from its predecessors, as if it were a new work, which indeed in many respects it is. The first edition appeared in 1845-6 in four pocket-volumes; addressed to the general public rather than to well-read students, it had no pretensions to the completeness or erudition displayed in many other Histories, being little more than a rapid survey of the course of metaphysical speculation, written with the avowed purpose of dissuading the youth of England from wasting energy on insoluble problems, and relying on a false Method. With this object of turning the mind from Metaphysics to Positive Philosophy, it employed History as an instrument of Criticism to disclose the successive failures of successive schools. In 1857, after a sale of several thousand copies of the stereotyped edition, the Library Edition, in one volume octavo, was prepared with a view of rendering the book more acceptable to students. A graver, fuller treatment of various portions, some important additions, and considerable alterations in the style were found necessary, but no change in purpose or doctrine.
